Myfau is receiving an update! First of all, improved performance and accessibility in all experiences. Have fun navigating in the newly structure menus with easy access to favorites, research and quick connections. Finally, we have reviewed the map, events and news with modern design and facilitating use in mind. Thanks to our wonderful Fau community, we hope you like these improvements and continue using MyFau! This app always shows that it is "loaded" but it is not always in reality, very annoying and uncomfortable. You broke the app. Principal I have to admit that I made a tough call when I decided to send my first review. It was partially justified, as the app did not fully respond. However, since then I have received feedback from the app developer, telling me about a simple solution. It seems a little redundant that some settings are needed for a proper function, but I will resume my immature comment and give the app the elogio it deserves. Well done. Thank you for your opinion! Can you tell us more about your concerns with the app? We suggested that users delete the cache on their app to fix many issues. You can learn more about how to clear your cache here If you still have problems, let me know! Update: we are very happy the correction worked for you. Thank you so much for giving us a second chance! Do what you should if you want to control basic things: financial aid, e-mail, registration status, etc. Not bad. It would be better if more things were naturally integrated into the app and seems a little clumsy, but it always beats on the web. Thank you for your opinion! If you have a few minutes, we would be very happy to know more about how we can continue to improve Myfau. Please go to and click the survey link to leave detailed feedback. Go for it!
